Product Overview

High-Performance Ventilation Motor

This versatile ventilation motor is engineered for use in a wide range of cooker hoods and exhaust fan systems. Designed for reliability and consistent airflow, it features a durable construction suitable for demanding kitchen environments. The unit offers flexible customization options regarding performance, physical dimensions, and aesthetic finishes to meet specific project requirements.

Technical Specifications

Performance Matrix

Model	Voltage (V)	Freq (Hz)	Power (W)	Speed (rpm)
YHC	110	50	20~60	1100~1350
YHC	110	60	20~60	1100~1350
YHC	220	50	20~60	1100~1350
YHC	220	60	20~60	1100~1350
YHC	230	50	20~60	1100~1350
YHC	240	50	20~60	1100~1350
