

Cooling Fan for Plastic Machinery

This compact cooling fan is designed for plastic machinery applications. It features a square frame with mounting holes for easy installation.

Overview

High-Efficiency Cooling Solution

This compact cooling fan is specifically engineered for integration into plastic machinery systems. Designed for reliability, the unit features a robust square frame and optimized blade geometry to ensure consistent airflow and heat dissipation. Its standardized dimensions and mounting points allow for seamless installation in tight industrial environments.

Physical Dimensions

Frame Dimensions	40 mm
Frame Tolerance	0.3 mm
Fan Thickness	10 mm
Mounting Hole Diameter	3.4 mm
Mounting Hole Tolerance	0.1 mm

Electrical & Connectivity

Wire Length	300 mm
Wire Length Tolerance	5 mm

Features

Key Design Features	Square Frame, Compact Design, Integrated Wiring
