

Cooling Fan for Textile Machinery

This compact cooling fan is designed for apparel and textile machinery. It features a square frame with mounting holes and optimized blades for efficient airflow.

Product Overview

High-Efficiency Cooling for Textile Machinery

This compact cooling fan is specifically engineered for use in demanding apparel and textile manufacturing environments. Featuring an optimized blade design, it delivers consistent airflow while maintaining quiet operation. Its standardized square frame and mounting system allow for seamless integration into existing industrial machinery where thermal management is critical.

Technical Specifications

Key Performance Indicators

1 High

Airflow Optimization

1 Low

Operational Noise

Primary Applications

- Apparel Machinery
- Textile Production Lines
- Thermal Management Systems

Design Features

Compact Design, Square Frame, Industrial Grade, Easy Installation
