

Cooling System Leak Stopper

Cooling system leak stopper is designed to address minor leaks in automotive cooling systems. It works to prevent corrosion and reduce rust build-up within the system.

Product Overview

Professional Cooling System Solution

This cooling system leak stopper is designed to effectively address and seal minor leaks within automotive cooling systems. Its advanced formula not only blocks leakage but also provides essential protection by preventing corrosion and reducing rust build-up. Engineered for versatility, the solution is compatible with most standard antifreeze and cooling system types, offering a reliable maintenance tool for professional automotive care.

Technical Specifications

Net Content	354 ml
Volume (Fluid Ounces)	12 fl oz

Key Features

Primary Benefits	Leakage Blocking, Anti-Corrosion, Anti-Rust
------------------	---

Compatibility

Compatibility	Most types of antifreeze and automotive cooling systems
---------------	---
