

Copper Alloy Non-Sparking G-Clamp

This G-clamp is constructed from copper alloy, ensuring it will not spark. It is suitable for applications where safety is a priority.

Product Overview

Professional Non-Sparking Clamping Solution

This copper alloy G-clamp is engineered for safety and performance in hazardous environments where non-sparking tools are mandatory. Suitable for both metalworking and woodworking applications, it features a robust frame and a precise threaded screw mechanism for reliable pressure application. Its specialized material composition ensures durability while maintaining the critical non-sparking properties required for industrial safety.

Materials & Safety

Safety Rating

Non-Sparking

Material Options

Aluminum Bronze, Beryllium Bronze

Technical Specifications

Size and Capacity Dimensions

Size (Inch)	Depth (mm)	Max Opening (mm)
1"	25	25
2"	30	50
3"	50	78
4"	60	100
5"	70	128
6"	80	156
8"	95	205
10"	100	250
12"	100	285
