

Copper Cable Lug Connector

Copper cable lugs are designed to terminate electrical cables. These connectors provide a secure and reliable connection point for wires in electrical installations.

Product Overview

Professional Copper Cable Lugs

These high-quality copper cable lug connectors are designed for secure and reliable electrical cable termination. Engineered to ensure efficient power transmission, they are essential components for electrical installations and maintenance projects. With a range of sizes available, they accommodate various cable gauges to meet diverse industrial requirements.

Technical Specifications

Available Sizes

- 70-12
- 95-12
- 120-12
- 150-16
- 185-16

Material

Copper

Application

Electrical Installation, Cable Termination, Power Transmission
