

Copper Casing Terminals for Power Cables

These copper casing terminals are designed for connecting copper conductors in power cables to electronic equipment. They are made from 99.99% pure copper tube T2 and coated with tin.

Product Overview

High-Performance Butt Connectors

These intermediate casing terminals are engineered for the reliable connection of copper conductors in power cable and electronic equipment applications. Constructed from 99.99% pure T2 copper tubing and finished with a durable tin coating, they ensure excellent conductivity and corrosion resistance. Designed to withstand demanding environments, these connectors operate effectively within a temperature range of -55°C to 150°C.

Technical Specifications

Material	99.99% Pure T2 Copper
Surface Finish	Tin-coated
Operating Temperature	-55°C to 150°C
Compatible Conductor Section	1.5 - 400 mm ²

Certifications

Certifications	IATF16949, ISO 9001:2015, RoHS, IRIS
----------------	--------------------------------------

Dimensional Data

Standard Dimensions

Item No.	OD (mm)	ID (mm)	Length (mm)
M1.5	4	2.4	22
M10	6.9	4.7	25
M50	12.5	9.5	35
M150	21	16.5	59
M400	32.8	26.8	106
