

Copper Flow Control Valve

This copper valve is designed for precise flow control in plumbing and industrial applications. The durable copper alloy body ensures corrosion resistance and longevity.

Product Overview

Precision Flow Control

This copper flow control valve is engineered for high-performance fluid management in both plumbing and industrial environments. Constructed from a durable copper alloy, the valve offers excellent corrosion resistance and long-term reliability. It is equipped with a manual adjustment knob, allowing for precise flow regulation and ease of operation in demanding applications.

Technical Specifications

Material	Copper Alloy
Connection Size	1/2 inch
Connection Type	Threaded
Compatible Media	Water, Oil, Gas

Key Features

Key Features

- Corrosion-resistant copper alloy body
- Manual adjustment knob for precise control
- Leak-proof threaded installation
- Suitable for industrial and plumbing use
