Product Overview

Professional Grounding Solution

This copper C-clamp is engineered for electrical power wire fitting and grounding rod applications. Designed for high conductivity and long-term durability, it ensures secure and reliable connections in transmission and distribution systems. Its robust construction provides excellent mechanical strength and corrosion resistance, making it suitable for demanding environmental conditions.

Technical Specifications

High-conductivity copper C-clamp designed for secure grounding and power wire connections.

Primary Applications

- Grounding Rod Connections
- Power Transmission Systems
- Distribution Networks
- Electrical Power Fittings

Material

High-quality Copper

Key Features

High Conductivity, Corrosion Resistant, Secure Connection, Robust Design

Compliance & Quality

Certifications

CE • ISO • UL • BV • SGS

Warranty Period

1 Year

Ordering & Logistics

Standard Lead Time

15 Days

Lead Time

Sample Availability

Yes
