

Copper Grounding Clips and Strap Kit

This kit includes copper clips in multiple sizes and a copper strap. The strap features pre-drilled holes for easy installation in electrical grounding applications, ensuring safety and reliability.

Overview

Professional Grounding Solution

This Copper Grounding Clips and Strap Kit is engineered for secure and reliable electrical grounding applications. The kit includes a versatile selection of clip sizes and a pre-drilled copper strap, facilitating straightforward installation. Constructed from high-quality copper, the components offer optimal electrical conductivity and excellent corrosion resistance for long-term safety.

Material & Construction

Material	Copper
Corrosion Resistance	Yes

Design Features

Kit Contents

- Copper grounding strap
- Assorted clip sizes

Installation Features

Pre-drilled holes, Easy installation, Secure connection

Applications

Primary Application

Electrical Grounding
