

Copper Wire Cable Lug Terminal

These terminals connect copper conductors in power cables to electronic equipment, accommodating sections from 1.5-1000mm². They are made from high-purity T2 copper tube with a copper content of e99.9% and feature a tin coating.

General Overview

Professional Copper Cable Lugs

These high-purity T2 copper cable lugs (SC/JGK series) are designed for reliable electrical connections in power distribution and electronic equipment. Engineered with a copper content of e99.9% and featuring a tin-plated finish, they offer excellent conductivity and corrosion resistance. They are suitable for cable cross-sections ranging from 1.5mm² to 1000mm² and operate effectively in temperatures from -55°C to 150°C.

Material High-purity T2 Copper, Tin-plated, e99.9% Copper Content
