

Corded and Cordless Telephone Set

This versatile communication solution features both a corded desk phone and a cordless handset. The corded phone has a keypad and function buttons, while the cordless phone provides mobility.

Product Overview

Versatile Communication Solution

This dual-component telephone system combines the reliability of a corded desk phone with the flexibility of a cordless handset. Designed to meet the demands of busy home or office environments, the system ensures consistent connectivity and mobility. Users benefit from an integrated digital display and a comprehensive keypad layout for efficient call management.
