Product Overview

Professional Corded Angle Grinder

This high-performance corded angle grinder is engineered for efficient grinding and cutting tasks in metalworking and construction environments. It features a robust motor capable of reaching 11,000 RPM for consistent material removal. Designed with durability in mind, the tool incorporates advanced dust protection and oil-leakage prevention systems to extend its service life.

Technical Specifications

Rated Speed

11000 RPM

No-load Speed

Power Rating

1010 W

Design & Durability

Durability Features

- Labyrinth dustproof design on bearing block
- Anti-oil leakage structure on O-ring
- Double ball bearing spindle support

Ergonomic Design

15-degree forward side handle for improved comfort and control

Applications

Suitable Applications

Metalworking, Construction, Cutting, Grinding, General Maintenance
