

Corded Demolition Hammer with Anti-Vibration Technology

This corded demolition hammer is designed for heavy-duty work. It features an anti-vibration technology system to reduce user fatigue and increase comfort during use.

Overview

Heavy-Duty Demolition Performance

This corded demolition hammer is engineered for professional construction and demolition tasks, focusing on high impact energy and user comfort. It features an advanced triple anti-vibration system to minimize fatigue during prolonged operation. Equipped with a large 52mm cylinder and intelligent maintenance indicators, this tool ensures consistent power and reliability on the job site.

Performance & Technology

Vibration Control

Triple Anti-Vibration System

Cylinder Diameter	52 mm
Power Features	Constant Speed Control, Auto Switch Lock-on

Maintenance & Safety

Integrated Indicators

- Service reminder light for maintenance scheduling
- Power indication light for cable integrity monitoring

Included Accessories

Storage	Blow Molded Case (BMC)
