

Corded Demolition Hammer with Anti-Vibration Technology

This corded demolition hammer delivers high impact energy for efficient material breaking. Anti-Vibration Technology minimizes user fatigue during prolonged use.

Product Overview

Heavy-Duty Demolition Performance

This corded demolition hammer is engineered for rigorous heavy-duty tasks, including the breaking of concrete, asphalt, and other hard materials. It features advanced Anti-Vibration Technology (AVT) to significantly reduce user fatigue during prolonged operation. Designed for efficiency and comfort, it includes a lock-on switch for continuous work and a soft-grip handle to improve control.

Key Features

Core Features

- HEX-30 tool holder for fast manual fastening
- Anti-vibration system for reduced fatigue
- Lock-on function for continuous operation
- Ergonomic soft-grip handle

Tool Holder Type

HEX-30

Package Contents

Included Accessories

Carrying Case (BMC)
