Product Overview

Professional Cordless Illumination

This 10.8V Lithium-Ion cordless work light utilizes advanced COB (Chip on Board) LED technology to deliver bright, wide, and even illumination for demanding work environments. Designed for maximum portability and ease of use, it is an essential tool for automotive, workshop, and general-purpose maintenance tasks. The durable construction and rechargeable battery system ensure consistent performance and extended run times for professional applications.

Technical Specifications

LED Power

5 W

Power Output

Power Source	10.8V Lithium-ion battery
Lighting Technology	COB (Chip on Board) LED

Features

Key Features

- Cordless design for maximum portability
- Wide and even light distribution
- Rechargeable battery system
- Durable construction
- Hands-free operation options (hanging hook or magnetic base)

Applications

Suitable For	Automotive, Workshop, Maintenance, DIY Tasks, General-purpose lighting
