Overview

Professional Cordless Performance

This high-performance cordless brushless angle grinder is designed for versatility in cutting, grinding, and polishing applications. Featuring a compact, ergonomic design with a soft rubber grip, it ensures user comfort and control even in tight workspaces. The advanced brushless motor combined with an efficient air cooling system provides long-lasting power and extended tool life for professional contractors and DIY enthusiasts alike.

Technical Specifications

Voltage

20 V
Voltage

Disc Diameter

- 100
- 115
- 125

No-load Speed

7000 rpm

Spindle Thread Capacity

M10, M14

Weight

1.4 kg

Features & Design

Key Features

Brushless Motor • Cordless • Multi-function • Lithium-ion • Industrial Grade

Design Highlights

Feature	Benefit
Shaft Lock	Quick disc replacement
Wheel Cover	Anti-skid waves for protection
Air Cooling	Efficient motor life extension
Gear Housing	All aluminium for durability

Compatibility

Battery Compatibility

- 20V 3.0Ah Battery
- 20V 4.0Ah Battery
