

Cordless Brushless Reciprocating Saw

This cordless reciprocating saw is equipped with a brushless motor. It is designed for cutting various materials and provides freedom of movement.

Overview

High-Performance Cordless Cutting

This cordless reciprocating saw features a high-efficiency brushless motor designed for extended runtime and superior performance in demanding environments. Operating on an 18V Li-ion platform, it provides the freedom of movement necessary for demolition work, pipe cutting, and general construction tasks. The tool is engineered for professional use, combining a rapid stroke rate with a quick-change blade system to maximize job site productivity.

Performance Metrics

Key Performance Metrics

3000 RPM

No-load Speed

25.4 mm

Stroke Length

18 V

Voltage

Technical Specifications

Battery Technology

18V • Li-Ion • 5.0Ah

Motor Type

Brushless Motor

Speed Control

0-3000 rpm

Features & Accessories

Included Accessories

- 1pc Wood cutting blade
- 1pc Metal cutting blade

Blade System

Quick change blade system

Applications

Primary Applications

Demolition, Pipe Cutting, General Construction, Woodworking, Metalworking
