

Cordless Dual Action Car Polisher

This cordless power tool is designed for polishing and sanding applications. It operates on an 18V lithium-ion battery and features a variable speed range from 1400 to 2100 RPM.

Product Overview

Professional Cordless Polishing Solution

This cordless dual-action car polisher is engineered for high-performance automotive detailing and surface finishing. Powered by an efficient 18V battery system, it offers the freedom of movement required for professional-grade work without the constraints of power cords. With variable speed control and multiple eccentric options, this tool delivers consistent, swirl-free results on a variety of surfaces.

Technical Specifications

Key Performance Metrics

400 W

Power Output

2800 rpm

Max Speed

150 mm

Max Disc Diameter

Power System

- 18V Voltage
- 2.0Ah Battery Support
- 4.0Ah Battery Support

Operating Specifications

Specification	Details
Speed Range	1000-2800 rpm
Disc Diameter	125mm / 150mm
Eccentric Distance	9mm / 15mm / 21mm

Compliance & Origin

Manufacturing Origin	Zhejiang, China
Certifications	CE
