Overview

Professional Cordless Pruning Solution

This 3.6V cordless electric pruning shear system is designed to transform garden maintenance by replacing manual tools with effortless, motorized cutting. Featuring high-strength Japanese SK5 steel blades and an ergonomic double-trigger safety system, it provides clean, precise cuts with minimal physical strain. The included extension pole set allows for a total reach of up to 190cm, making it an ideal choice for orchards, parks, and large-scale landscaping tasks.
