

# Cordless Hammer Drill with Variable Speed

This cordless hammer drill is designed for drilling and driving screws into various materials. It features variable speed control and multiple clutch settings for precise torque adjustment.

## Product Overview

### Versatile Cordless Hammer Drill

This high-performance power tool is designed for drilling and driving screws into wood, metal, and masonry with ease. Powered by a 36V battery, it provides the necessary torque for demanding applications while maintaining portable convenience. The integrated hammer function ensures efficient drilling into tougher materials like concrete and brick, making it an essential tool for professional projects.

## Performance

### Battery Voltage

**36 V**

Operating Voltage

### Speed Control

Variable speed control for precise operation

### Torque Adjustment

Multiple clutch settings for precise torque control

## Capabilities

### Core Functions

- Drilling
- Screw Driving
- Hammer Drilling

### Compatible Materials

Wood, Metal, Masonry, Concrete, Brick

## Design & Ergonomics

### Design Features

- Ergonomic handle design
- Auxiliary handle for controlled operation
- Robust chuck for secure bit retention

### Power Source

Cordless • Battery Powered
