

Cordless Hot Melt Glue Gun

This cordless glue gun is powered by a 3.7V Li-ion battery for convenient portability. It features an ergonomic handle, rapid heating, consistent glue flow, and a safety nozzle.

Product Overview

Versatile Cordless Bonding Solution

This cordless hot melt glue gun offers professional-grade performance with the freedom of battery-powered operation. Featuring an extremely fast 20-second preheating time and an anti-drip precision nozzle, it is designed for high-accuracy DIY projects, crafts, and household repairs. The integrated safety features, including an automatic shut-off and LED status indicators, ensure a reliable and user-friendly experience for various bonding applications.

Performance Highlights

Performance Metrics

20 s

Heating Time

170

Max Temp

30 min

Runtime

Battery & Charging

Charging Requirements

- Output Voltage: 5V
- Charging Current: 1000mA
- USB Rechargeable
- Compatible with standard USB ports

Battery Capacity	1300 mAh
Rated Voltage	3.7 V
Charging Duration	1.5 - 2.0 hours

Safety & Intelligence

LED Status Indicators

Ready Status (Green) • Low Battery (Red) • Charging (Red) • Fully Charged (Green)

Auto Shut-Off	Triggers after 100 seconds of non-use
---------------	---------------------------------------

Application & Design

Nozzle Design	Anti-drip precision fine tip with safety cover
Recommended Applications	Furniture Repair, Arts & Crafts, Toys, Shoes, Glass Fish Tanks, Circuit Boards

Technical Specifications

Operating Parameters

Parameter	Value
Warm-up Temperature	170 / 338
Operating Duration	Approx. 30 min (4 glue sticks)
Battery Type	Built-in Lithium-ion
Base Design	One-piece solid base
