

Cordless LED Work Light with Adjustable Stand

This cordless work light features a rectangular LED array for bright illumination. It includes a sturdy frame stand for stability and portability.

Product Overview

Professional Cordless Illumination

This high-performance cordless LED work light is engineered for demanding job sites where reliable, portable lighting is essential. Featuring a 20W output with adjustable brightness settings and color temperatures, it provides versatile illumination for various tasks. The robust, swiveling head and stable tubular stand ensure you can direct light exactly where needed, while the compatible multi-capacity battery system offers extended runtime.
