

Cordless Lithium Battery Lawn Mower

This cordless lawn mower is powered by a 58V MAX lithium battery and features a durable cutting deck. Designed for ease of use, it offers an eco-friendly alternative to gas-powered mowers.

Product Overview

High-Performance Cordless Mowing

This cordless lawn mower is powered by a high-capacity 58V MAX lithium-ion battery, providing a powerful and eco-friendly alternative to gas-powered equipment. It features a durable cutting deck designed for longevity and adjustable cutting heights to suit various lawn conditions. Complete with a grass collection bag, this unit is engineered for efficient maintenance, maneuverability, and ease of use in residential or commercial settings.
