

Cordless Metal Cutting and Bending Tool

This cordless tool is designed for cutting and bending metal. It features a rechargeable battery pack for mobile operation in construction, fabrication, and repair tasks.

Product Overview

Professional Cordless Metalworking Solution

This portable, cordless cutting and fold-bend machine is engineered for versatile metalworking applications. Designed for mobility and efficiency, it combines a robust cutting head with an ergonomic handle, making it an essential tool for on-site construction, fabrication, and repair tasks. The rechargeable battery system ensures consistent performance without the limitation of power cords.

Key Features

Core Capabilities

- Cordless operation for high mobility
- Integrated cutting and bending functionality
- Robust cutting head design
- Ergonomic handle for user comfort
- Rechargeable battery power system

Application Areas

Ideal For

Construction, Metal Fabrication, Repair Tasks, On-site Metalworking
