

# Cordless Orbital Finishing Sander

The Cordless Orbital Finishing Sander is a versatile power tool designed for fine sanding and surface preparation. Featuring a compact and ergonomic design, it provides comfortable handling and maneuverability.

## Product Overview

### Professional Finishing Performance

The Cordless Orbital Finishing Sander is a versatile power tool engineered for precision surface preparation and fine finishing. Its orbital motion ensures a smooth, swirl-free result across wood, metal, and plastic surfaces. Designed with portability in mind, the cordless operation allows for unrestricted movement, while the ergonomic build ensures comfort during extended use.

## Technical Specifications

Power Source	Cordless
Sanding Action	Orbital
Compatible Materials	Wood, Metal, Plastic

## Key Features

### Core Functionalities

- Variable speed control
- Integrated dust collection system
- Quick-change sanding pad system
- Ergonomic design

Suitable For	DIY Enthusiasts, Professional Contractors
