

# Cordless Power Impact Driver

This cordless impact driver is engineered for efficient fastening. It features variable speed control and a compact design, making it suitable for various tasks.

## Product Overview

### High-Performance Cordless Impact Driver

This cordless impact driver is engineered for demanding fastening applications across construction and automotive repair sectors. It features a powerful motor designed for high efficiency and a compact form factor that allows for easy access in tight, restricted spaces. With variable speed control, users can achieve precise results, while the ergonomic grip ensures comfort during extended operation.

## Key Features

### Core Capabilities

- Powerful motor for efficient driving
- Variable speed control for precision
- Compact design for tight spaces
- Ergonomic handle grip

### Ideal Applications

Construction, Automotive Repair, Fastening

## Power & Compatibility

### Power Source

Cordless

### Battery Included

No

### Charger Included

No
