

# Cordless Reciprocating Saw

This cordless reciprocating saw has a high-performance motor for fast cutting in various materials. It features a tool-less blade change system for quick and easy blade replacements.

## Product Overview

### High-Performance Cordless Versatility

This cordless reciprocating saw is engineered for demanding tasks, offering powerful cutting capabilities across diverse materials including wood and soft metal. Designed for professional efficiency, it features a tool-less blade change system that minimizes downtime during operation. The ergonomic build ensures user comfort, making it an ideal choice for demolition, pipe cutting, and pruning applications.

## Key Features

### Power Technology

Lithium-Ion • Cordless

### Cutting Applications

Wood, Soft Metal, Demolition, Pipe Cutting, Pruning

### Blade Replacement

Keyless / Tool-less

## Design & Ergonomics

### Design Highlights

- Ergonomic handle for reduced fatigue
- Adjustable pivoting shoe for control
- High-performance motor
