Overview

High-Performance 18V Brushless Rotary Hammer

This cordless rotary hammer is engineered for professional construction and demolition tasks, featuring a high-performance brushless motor for extended runtime and power. It offers three distinct operating modes—drill, hammer, and drill-hammer—providing the versatility needed for concrete, steel, and wood applications. Designed with user comfort in mind, it includes an ergonomic grip and vibration control to reduce fatigue during heavy-duty use.

Technical Specifications

Motor Type

Brushless

Operating Voltage

18 V

Available Battery Capacities

3.0Ah, 4.0Ah, 6.0Ah

Drilling Capacity

Maximum Drilling Diameters

Material	Capacity (mm)
Concrete	26
Wood	20
Steel	13

Functional Features

Operating Modes

- Drill (Rotation only)
- Hammer (Chiseling)
- Drill + Hammer (Rotary Hammering)

Design Features

- Vibration control system
- Ergonomic handle design
- Quick-change chuck
- Depth rod for precision
