Product Overview

Professional Milling Solution

This comprehensive milling system is designed for the efficient processing of wheat and maize into high-quality flour and grits. The turnkey solution integrates advanced grinding, sifting, and material handling technologies to ensure consistent particle size and output quality. Engineered for industrial-scale operations, this equipment supports the production of staple food products like Nshima, Ugali, and injera flour.

Technical Capabilities

Processed Materials	Wheat, Maize, Corn
Output Products	Flour, Grits, 24# M Grits

System Components

Included Equipment

- Roller Mill
- Elevators
- Sifters
- Degerminators
- Grinders
- Automatic Packing Machine

Service & Support

Warranty & Support

1-Year Quality Guarantee • Free Spare Parts Included • Lifelong Service

Turnkey Services

- Specialized Design
- Installation
- Commissioning
- Worker Training
