Product Overview

Industrial Corn Processing Solution

This industrial-grade corn flour milling system is designed for high-volume, continuous processing operations. It integrates multiple stages, including grain cleaning, milling, and sifting, to produce consistent grades of corn flour and grits. Built for durability and efficiency, the system includes robust machinery, automated material handling, and bagging stations to support streamlined food production workflows.

Technical Capabilities

Service & Warranty

1 Year

Warranty Period

1 Year

Spare Parts Coverage

Output Varieties

Corn Flour, Corn Grits, Wheat Flour, Wheat Semolina

Operational Features

Key Components

- Milling Units
- Elevators
- Sifters
- Cyclones
- Material Handling Pipes
- Bagging Stations

Maintenance & Safety

Easy-access maintenance points • Safety guards included • Turnkey project support
