Product Overview

Industrial Grain Processing Solution

This professional-grade grain milling system is engineered for high-volume production of flour and meal from corn, wheat, and other grains. Utilizing advanced roller mill technology and automated separation processes, the system ensures consistent output quality suitable for large-scale food processing facilities. The modular design supports scalability and precision control, making it a reliable choice for commercial agricultural operations.

Technical Capabilities

Key System Components

- Roller Mills
- Sifters
- Pneumatic Conveying Systems
- Automated Weighing and Bagging Station

Compatible Grains

Corn, Wheat, Maize

Service & Warranty

Warranty Period

1 Year

Quality Guarantee

Support Services

Turnkey Project Design • Installation Support • Commissioning • Worker Training • Spare Parts Included
