

Corrosion-Resistant Submersible Water Pump

This submersible water pump is designed for efficient water extraction. Its corrosion-resistant construction makes it suitable for various water conditions and ideal for HVAC&R applications.

Overview

Corrosion-Resistant Submersible Pump

This submersible water pump is specifically engineered for demanding environments where corrosion is a primary concern, such as sea farming and industrial water systems. Featuring imported mechanical seals and high-precision manufacturing, it offers a service life two to three times longer than standard pumps. Designed for reliability, this unit ensures consistent performance in harsh conditions.

Technical Specifications

Performance Advantage

3 x

Max Lifetime Multiplier

Model Series	100QJ
Durability Features	Corrosion-Proof, High-Precision Processing, Imported Mechanical Seal

Applications

Suitable Environments

- Sea farming
- Corrosive environments
- HVAC&R water pumping systems
