

Corrosion Resistant Undercoat Spray

This product is an undercoat and rustproofing solution designed to protect surfaces from corrosion and wear. The product provides a durable protective layer, extending the lifespan of treated materials by resisting rust and environmental damage.

Product Overview

Professional Corrosion Protection

This corrosion resistant undercoat spray is engineered to provide a high-performance protective barrier for vehicles and industrial components. The formula effectively creates a specialized film that guards surfaces against abrasion, rust, and spatter, ensuring long-term structural integrity. Designed for versatility and endurance, it provides up to five years of protection against environmental stressors, including steam, alkali, and gravel impact.

Technical Specifications

Duration of Protection

5 years

Protection Lifespan

Net Weight	2000 g
Application Method	Specialized spray gun

Key Benefits

Key Features

- Corrosion resistance
- Abrasion prevention
- Rust protection
- Resistant to steam and alkali
- Protection against gravel erosion

Certification and Compliance

Model Identifier

S4100
