

Corrosive Liquid Tank Semi-Trailer

This semi-trailer is designed for transporting corrosive liquids. It features a cylindrical tank mounted on a multi-axle chassis.

Overview

Corrosive Liquid Transport Solution

This corrosive liquid tank semi-trailer is engineered for the safe and efficient transport of hazardous chemical substances. Featuring a robust cylindrical tank design mounted on a heavy-duty multi-axle chassis, it ensures stability and durability during transit. The unit includes integrated safety features such as top access railings, making loading and unloading operations secure for operators.
