Product Overview

High-Performance Corundum Abrasive Paper

This premium abrasive paper utilizes high-quality Aluminum Oxide abrasives bonded with a durable resin-over-resin system. Built on a 15% latex CWT blue paper backing imported from Europe, it features special impregnation and coating to prevent clogging and resist static. Designed for professional use, it offers superior sanding efficiency and extended product lifespan across various industrial applications.

Technical Specifications

Abrasive Material	Aluminum Oxide
Backing Material	15% Latex CWT Blue Paper (Imported)
Available Grit Range	P60 - P1000
Bonding System	Resin over Resin

Key Features

Key Features	Anti-Clogging, Anti-Static, Super Flexible, High Durability
--------------	---

Applications

Primary Applications

- Hard wood sanding
- Furniture industry
- Metal working
- Aluminium alloy polishing
- Metallurgical appliances

Product Formats

Available Formats

Sheets • Narrow Rolls • Velcro Discs • PSA Discs
