

Countersink Bit

This is a high-speed steel (HSS) countersink with a 60-degree countersink angle and three cutting edges. It features a tin-coated surface treatment for enhanced durability and performance.

Product Overview

High-Performance HSS Countersink Bit

This professional-grade countersink bit is engineered from high-speed steel (HSS) for superior durability and cutting efficiency. Designed with a 60-degree countersink angle and three precision cutting edges, it ensures clean, accurate finishes on a variety of materials. The surface is enhanced with a TiN (Titanium Nitride) coating, significantly extending tool life and improving performance under demanding conditions.

Technical Specifications

Surface Treatment

TiN-Coated

Material

High-Speed Steel (HSS)

Countersink Angle

60 °

Number of Cutting Edges

3
