

Countersink Drill Bit

This high-speed steel countersink drill bit is designed for creating countersunk holes in various materials. It features a 90-degree countersink angle and multiple cutting edges.

Product Overview

High-Performance Countersink Drill Bit

This high-speed steel (HSS) countersink drill bit is engineered for precision and durability in industrial drilling applications. Featuring a 90-degree countersink angle and four or more cutting edges, it ensures clean and efficient material removal. The titanium nitride (TiN) coating further enhances surface hardness and extends tool life, making it a reliable choice for various metalworking tasks.

Technical Specifications

Surface Treatment

TiN-Coated

Material

High-Speed Steel (HSS)

Countersink Angle

90 degrees

Cutting Edges

e 4
