

# Countertop Hot Air Fryer

This air fryer cooks food by circulating hot air, creating a crispy exterior. It offers a healthier alternative to deep frying by using little to no oil.

## ADDITIONAL IMAGES

## Product Overview

### Healthy Cooking Technology

This compact countertop air fryer utilizes rapid hot air circulation to cook food, creating a crispy outer layer similar to traditional frying but with little to no oil. The system works by heating air at the top and forcing it through a powerful fan to circulate around the food basket, effectively removing water vapor for optimal texture. It is a versatile kitchen appliance suitable for frying, baking, grilling, and roasting.

## Performance Metrics

### Temperature Range

<b>80 °C</b> Min Temperature	<b>200 °C</b> Max Temperature
---------------------------------	----------------------------------

### Maximum Timer Duration

30 minutes

## Safety & Convenience

### Indicator Lights

- Power-on light
- Temperature light
- Ready bell

### Safety Features

Non-slip feet, Cool-touch handgrips, Automatic shut-off

## Design & Usability

### Design Details

- Removable frying basket
- Cord storage
- Temperature adjustor
- 30-minutes timer
