

Countertop Ice Maker and Crusher

This compact ice maker and crusher is designed for home or small office use. It features a self-contained unit with electronic controls to produce both ice cubes and crushed ice.

Overview

Compact Ice Solution

This versatile countertop unit is engineered to serve as both an ice maker and an ice crusher, making it an ideal addition to small offices or breakrooms. The self-contained design features intuitive electronic controls for seamless operation, allowing users to switch between ice cubes and crushed ice with ease. With its durable construction and space-saving footprint, it provides a reliable and efficient solution for on-demand ice production.
