

Countertop Reverse Osmosis Hot Water Dispenser

This countertop dispenser provides purified hot water on demand. It features easy filter changes and a design suitable for various cups and pots.

ADDITIONAL IMAGES

Product Overview

Compact and efficient countertop design for instant water purification.

Instant Pure Water Solution

This advanced countertop reverse osmosis system provides instant access to purified hot water, perfect for home or office environments. Utilizing sophisticated RO and SPE filtration, it effectively removes contaminants while enriching water with hydrogen molecules. With its compact design and hassle-free installation, you can enjoy clean, high-quality water for drinking and cooking without the need for complex plumbing.

Technical Specifications

Model Number	W20
Rated Purification Capacity	2000 L
Hot Water Capacity	18L/H (<90)
Initial Water Purification Rate	30 L/h
Working Pressure	0.4~0.6MPa

System Capacity

Raw Water Tank Capacity	6 L
Waste Water Tank Capacity	2.5 L

Electrical Requirements

Voltage	220 V
Frequency	50 Hz

Key Features

Professional-grade filtration technology in a portable unit.

Ease of Use

- Hassle-free installation within minutes
- Tool-free filter replacement system
- Compatible with various cups and pots
- Space-saving countertop design

Highlighted Benefits

Instant Heating, Hydrogen Rich Water, RO Filtration, Child Lock, Portable Design
