

Covered Passenger Tricycle

This tricycle is designed for transporting passengers. It features a covered passenger area and a three-wheel design for stability.

Product Overview

Rugged Passenger Tricycle

This covered passenger tricycle offers a practical and eco-friendly solution for short-distance urban or rural transport. Featuring a robust three-wheel design and an enclosed passenger cabin with protective canvas covering, it ensures both stability and passenger comfort. Its non-motorized configuration provides a low-maintenance, cost-effective transit option for professional operators.
