

CR123A Lithium Primary Battery

This high-energy density lithium primary battery delivers a stable 3.0V output. It is designed for devices requiring reliable, long-lasting power.

Product Overview

High-Performance Lithium Primary Power

This CR123A lithium primary battery is engineered for high-energy density and reliable power delivery in demanding electronic applications. With a nominal voltage of 3.0V, it offers a stable discharge rate and superior performance compared to conventional alkaline alternatives. Its robust construction ensures durability and safety, making it an ideal choice for professional-grade portable electronics and security systems.

Technical Specifications

Nominal Voltage	3 V
Chemistry	Lithium Manganese Dioxide (Li/MnO ₂)

Certifications

Compliance & Certifications	CE, UL, UN, RoHS, ISO 9001, ISO 14001
-----------------------------	---------------------------------------

Applications

Primary Applications

- Electricity meters
- Water meters
- Gas meters
- Heat meters
- Security systems
- Medical devices
- GPS tracking
- RFID technology
- Military equipment
- Cameras and photography
- Portable flashlights
