

CR2032 Lithium Coin Cell Battery 3V

This CR2032 lithium coin cell battery features 0% mercury, lead, and cadmium. It provides a stable power supply and has an extremely small self-discharge rate.

Product Overview

Reliable Power for Compact Devices

The CR2032 lithium coin cell battery is engineered for high energy density and long-term reliability in small electronic applications. With a stable 3V output and a wide operating temperature range, it ensures consistent performance for critical devices. Its compact form factor makes it an ideal power source for everyday consumer electronics and specialized medical equipment.

Technical Specifications

Nominal Voltage	3 V
Diameter	20 mm
Thickness	3.2 mm
Battery Chemistry	Lithium

Application & Usage

Typical Applications

- Watches
- Calculators
- Remote controls
- Key fobs
- Medical devices
