

Crawler Mounted Water Well Drilling Rig

The DSHJ-50L crawler drill rig is designed for anchoring and jet-grouting. It integrates a crawler, mud pump, and control panel for efficient drilling.

Overview

High-Performance Drilling Rig

The DSHJ-50L is a professional-grade, crawler-mounted water well drilling rig designed for maximum mobility and reliability in the field. Featuring a powerful top-drive head, it ensures efficient penetration and core extraction across diverse geological formations. Its robust crawler system provides exceptional stability and ease of movement on uneven or challenging terrain, making it an ideal solution for water well drilling and geological exploration projects.

Technical Specifications

Mobility Features

- Crawler-mounted chassis
- High terrain stability
- Portable design

Rig Type

Crawler-mounted, top-drive head

Primary Applications

Water Well Drilling, Geological Exploration

Performance

Performance Metrics
