

Crimped Copperized Wire Cup Brush

This cup brush features crimped and copperized wire for effective material removal. It is designed with an M14 thread for easy attachment to angle grinders and has a diameter of 75mm.

Product Overview

High-Performance Surface Preparation

This crimped and copperized wire cup brush is engineered for professional surface preparation, cleaning, and rust removal tasks. Designed for compatibility with standard angle grinders, it features a durable M14 thread for secure mounting. The 0.3mm wire construction ensures effective material removal while maintaining longevity during heavy-duty metalwork.
