

Crimped Copperized Wire Cup Brush

Crimped copperized wire cup brush designed for surface preparation, cleaning, and rust removal. It is suitable for use with angle grinders and other rotary power tools for metalworking, automotive, and construction applications.

Product Overview

Professional Surface Preparation

This crimped and copperized wire cup brush is engineered for demanding surface preparation, cleaning, and rust removal tasks. Designed with a robust construction for durability, it ensures efficient material removal in metalworking, automotive, and construction environments. It is fully compatible with standard angle grinders and rotary power tools, making it a versatile addition to any professional toolkit.

Technical Specifications

Wire Diameter	0.3 mm
Mounting Thread	M14
Brush Type	Crimped Wire Cup Brush
Coating	Copperized

Key Features

Tool Compatibility

- Angle Grinders
- Rotary Power Tools

Suitable Applications

Surface Preparation, Rust Removal, Cleaning, Metalworking, Automotive, Construction
