Product Overview

Crimped Wire Conical Brush

These crimped wire conical brushes are engineered for professional surface preparation, cleaning, and deburring applications. The crimped wire design offers superior flexibility, allowing the brush to conform to irregular surfaces for uniform material removal. With a conical shape, these brushes are specifically designed to access tight spaces, corners, and intricate details, making them essential for weld cleaning, rust removal, and paint stripping tasks.

Technical Specifications

Maximum Speed

9000 RPM

Max RPM

Construction

Crimped wire

Usage & Safety

Compatible Materials

- Metal
- Wood
- Plastic

Common Applications

Weld Cleaning • Rust Removal • Paint Stripping • Deburring

Safety Requirements

Wear Eye Protection, Warning
