

Crinkle Cut Vegetable Slicer

This machine slices potatoes, sweet potatoes, carrots, and taro into crinkle-cut pieces, ensuring a smooth surface and preserving nutritional value. Slice thickness is adjustable from 2-6mm.

Overview

Professional Crinkle Cut Slicer

This high-efficiency vegetable slicer is engineered for commercial food processing environments, including kitchens, restaurants, and food manufacturing plants. It specializes in producing consistent, high-quality wave-cut slices from potatoes, sweet potatoes, carrots, and taro. With adjustable thickness settings and a robust, compact design, it offers a reliable solution for optimizing food preparation throughput.
