

Cross Pein Hammer with Fiberglass Handle

This cross pein hammer is designed for metalworking and shaping tasks. It features a plastic-coated fiberglass handle for enhanced grip and durability.

Product Overview

Professional Cross Pein Hammer

This cross pein hammer is engineered for precision metalworking and shaping tasks. Featuring a high-quality head design, it is perfectly suited for riveting, bending, and general metal manipulation. The durable construction ensures reliability in demanding workshop environments.

Design & Build

Handle Material	Fiberglass with plastic coating
Handle Benefits	Enhanced Grip, Durability, Shock Absorption

Applications

Recommended Uses

- Metal shaping
- Riveting
- General metalworking
- Hammering applications
